

Duralux Series Extends Range

New Beam Pattern Available – Two Lights and Harness Kits Available

**DURALUX

4 / 6
10° Spot Beam

September 23, 2014 - Auburn, WA – Vision X Lighting extends the versatility of the popular Duralux LED Light (DURA) series with the introduction of 10 Degree Beam Pattern models, which are to be sold individually or in a kit of two lights with a harness. These 4 or 6 LED lights provide outstanding distance and more light output than a 100 watt halogen light for any application be it work or play.

When the DURA series was launched earlier this year it was available in just 40 and 60 degree beam patterns. The rugged die-cast aluminum housing provides superior protection against the elements, and the universal single-bolt mount allows for a great range of adjustment. Each light is backed by the Vision X Lighting Extended Warranty for added piece of mind.
