

Expand Your Lighting With New Jeep TJ A-Pillar Brackets From Vision X
Works With Any Single-Bolt Light, Including the LED Light Cannon Series!

1997-2006

**Jeep TJ A-Pillar
Lighting Brackets**

April 29th, 2015 Auburn, WA – Vision X is excited to release a vehicle specific product for those who enjoy spending their weekend in a Jeep TJ. New A-Pillar mounting brackets are now available that allow 1997-2006 Jeep TJ owners to mount any lighting fixture that utilizes a single-bolt mounting system, such as the popular LED Light Cannon Series or Optimus Series, both available as Plug and Play Kits. These A-Pillar brackets do not require any drilling, and can be installed in minutes.

Previously exclusive to Jeep JK owners, Vision X is proud to expand the lighting options for Jeep TJ's and offer products specifically for Jeep TJ owners. The new A-Pillar brackets will allow TJ owners to install lights in a unique spot on their vehicle and be able to achieve distances of up to 1,000' feet. The Jeep TJ A-Pillar bracket is constructed out of high quality steel, and surpassed rugged product testing at the notorious King Of The Hammers event earlier this year.

With the addition of Jeep TJ Lighting Options, we've implemented the TJ as a new model on our Year, Make, Model selector on the website. Customers who are searching for a lighting solution on their Jeep TJ will now be easily provided with helpful information regarding their options.

Jeep TJ A-Pillar Kit Features:

- Tested With CTL-CPZ110KIT, XIL-OPH115KIT and XIL-OP110KIT
- Add Lighting Options to Unique Mounting Area
- Plug And Play Lighting Kits Available
- Easy No Drill Installation
- Low Profile Design
