

New Optimus Round Protection: Shatterproof Poly-Carbonate Covers

12 Lights in 1 while adding shatterproof protection

May 21st - Auburn, WA – Vision X Lighting announces the newest feature of the Optimus Round LED Pods: shatterproof poly-carbonate covers. The new covers allow for 12 unique configurations of just one light! With the snap of a cover, change the beam pattern or color of light output to easily match the conditions on the road, the trail, the dunes, or anywhere in between. The Optimus Round Covers improve visibility in snow, fog, and dust as well as providing for varied beam pattern configurations.

“From testimonials of truck operators in Alaska to racers in the Baja California, we have found that certain beam colors optimize visibility in certain conditions,” says Nick Irwin, Vice President of Product Development. Irwin states, “Red covers aid operators to see better in dust and orange increases visibility in fog by eliminating blue frequencies which reflect off of the water vapor of fog and dust particulate back at the driver. Likewise, blue lighting frequency enhances light output in snowy conditions by reflecting off snow and extending the lighting distance.”

The OPR covers also come in 3 unique beam configurations. Meant for use with the OPR110 and OPR110KIT, the light can be converted into a euro or trail flood patterned beam in addition to the spot beam pattern. The spot cover is a clear lens that serves as protection for the already spot optic in the OPR110. The euro cover is a flat horizontal beam which illuminates the path ahead while spreading light to the periphery, making this beam perfect for driving applications. Lastly, the trail flood is a vertical beam meant to light the ground beneath to the tree tops above, a beam perfect for lower-speed trail lighting illuminating all potential hazards.

Not only do the covers provide unique configurations for the Optimus Round LED Pod, the covers also provide unmatched protection. Blocking against rocks and debris, the durable construction of the shatterproof Optimus Round Poly-Carbonate Covers prolong the lifespan of the light. The Vision X Black-Out Cover is available for when the light is not in use and glows in the dark.

Item #	Part #	Description	Jobber
PCV-OPR1	9889528	OPTIMUS ROUND SERIES PCV PROTECTIVE COVER CLEAR	\$15.00
