

Relay High-Quality Video With Vision X Video Extreme Light
Reverse Lighting Combined with Video Camera To Relay Video Feed

**VIDEO
EXTREME LIGHT**
With 7" Monitor

March 31st, 2015 Auburn, WA – Today, Vision X Lighting announces the release of the Vision X Video Extreme Light (VEL), an innovative new LED lighting fixture that merges reverse lighting and a back-up camera into one unit. Most of today's reverse lights suffer at night due to lack of light from the vehicles factory reverse lights, but the Video Extreme Light excels at covering a large area behind the vehicle with ample light output, all while relaying it to a display.

The Video Extreme Light is perfect for any application, whether it be a standard pick-up truck, a long-haul commercial vehicle, or a utility service equipment. The light comes with a short (3.5") shield that blocks glare from entering the camera lens, if more protection is needed, a longer shield is also available. The light output from the LEDs do not wash out the camera, like with standard back-up lights. For those who have an existing monitor in their vehicle, the VEL can be wired to relay the video feed to the current display.

Additionally, the Vision X Video Extreme Light is available in a Kit package (VEL-CAMMON7KIT) that includes a 7" LED Monitor and a long 20' cord for wiring the monitor inside the vehicle for those that don't have an existing monitor. The VEL is also available in standard 6K LED Color Temperature, or High-Powered Infrared Light for those who wish to see at night without the light output.

The VEL can be used for a multitude of applications, such as security lighting and surveillance, service vehicle usage, night time monitoring (with infrared model) and many others.

Video Extreme Light Features:

- Illuminates Area While Simultaneously Relaying Video Feed
- Kit Available With 7" LED Monitor And 20' Cord
- Short-Shield Blocks Glare From Camera Lens
- Trunion Mounting Bracket Available (P-UMTRUNNION)
- 3,168 Raw Lumens
- IP68 Waterproof
