- Mix-n-Match Beam Patterns
- Fully Adjustable Lights

June 6th – Algona, WA – Vision X Lighting announces the availability of a LED fog light kit for the Ford Raptor. This kit is designed to be a direct install utilizing a provided factory integration wiring harness. The kit features four 3" square 10° beam pattern Optimus Series lights. These four Optimus lights produce an amazing 1416' of usable light, which is unmatched in a fog light upgrade kit. Not only does this kit produce maximum distance, but plenty of peripheral lighting due to the "halo effect" of the Iris Reflector; there will be plenty of light on either side of the vehicle. The Optimus also features Prime Drive Technology to control the heat levels of the light and make sure the LED lasts its 50,000 hour lifespan.

Prime Drive also allows for dimming capabilities, and only requires an additional dimmer switch.

When you're off the highway with your Ford Raptor and need lights that will withstand the punishment of going off road your Optimus lights will illuminate the way to your destination. With an IP-68 rating the Optimus is dustproof and submersible up to 10' of water. With a die-cast aluminum housing these lights are designed to withstand any environment.

Summary of Features:

- **1416'** of Unmatched Usable Light in a Kit
- Uses Factory Accessory Switch
- Maintains Factory Appearance
- Mix-n-Match Beam Patterns
- Fully Adjustable Lights
