LIGHTING SOLUTIONS

FOR INDUSTRIAL MARINE APPLICATIONS

Vision X Lighting offers a large increase in energy efficiency over older technologies while also increasing the safety and productivity of the working environment by producing 80% more light than traditional fixtures.

STAINLESS STEEL BRACKETS

Each fixture comes equipped with high-strength stainless steel brackets giving the light extra protection against salt water corrosion.

SALTWATER PROTECTION

The marine grade gloss coating used on Vision X Lighting products greatly reduces the dramatic impact that saltwater has on traditional lighting fixture housings.

ANTI-CORROSION

The maritime products from Vision X Lighting feature an above ground copper electronic board to eliminate any chance of corrosion.
