VXMARITIME.COM

Vision Motor Sports was established in 1997 with the mission to revolutionize the lighting industry. Today, we are doing just that. The Engineering, Product Development and Marketing is conducted from the Vision X USA office located in Auburn, Washington while Vision X Asia is home to the Manufacturing, Testing, and Inventory Logistics departments of Vision X Global Lighting. Today, Vision X has the mission of creating partners around the world to continue developing and marketing the most advanced lighting products in the world.

The key to Vision X's ongoing success, unmatched quality, and performance is our team of world class engineers who have taken outlandish concepts from conception to production. Our engineers are never afraid of reexamining products to find ways to better serve customers. Since its conception, Vision X has listened to the end user and put their ideas into action to further the quality, performance, and functionality of all Vision X products. At Vision X, we are constantly striving to live up to our company motto of "Lighting Evolved."

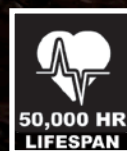

QUALITY AS A PRIORITY

INGRESS PROTECTION

Products are sprayed from close distances with 80~100 BAR water pressure to verify the ingress protection rating, ensuring they are sealed properly.

LONG TERM DURABILITY

Products are then switched on and off 20,000 times repeatedly to ensure that they remain functional after all testing.

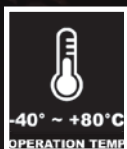

SUBMERSION & AGING

Once products are assembled every product is run through a submersion (water dunk) test, then placed onto an aging rack and powered up for 30 minutes.

POWER INPUT RANGE

All products are put on a digital power meter to test if it is consuming the correct amount of power, checking for any electrical faults.

THERMAL IMPACT

Products are placed in a -40°C chamber for 30 minutes, and then in a 80°C chamber for an additional 30 minutes. Products are then left on for 72 hours.

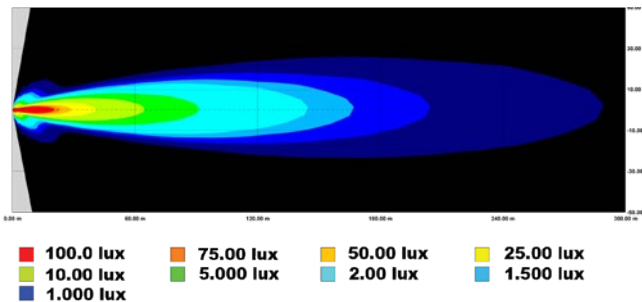

Vision X offers a number of different Halogen Lighting options. The Tungsten-Halogen series uses an oversized globe and specially engineered filament to enhance light output. Vision X offers many headlight replacements.

THE VISION X DIFFERENCE

Integrated Electronic Thermal Management automatically regulates heat levels by engaging ETM to prolong each LEDs lifespan to 50,000 hours.

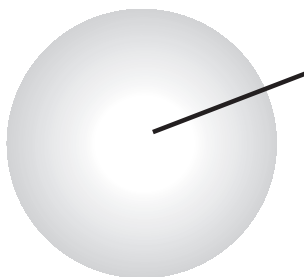

MEASURING LIGHT OUTPUT

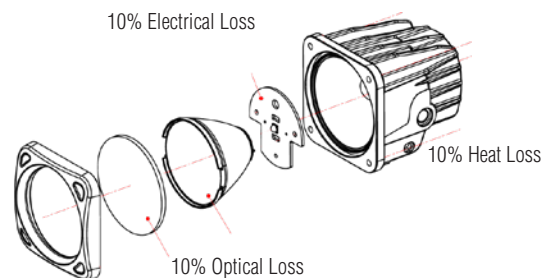

USABLE LIGHT = DISTANCE

Usable light is defined as the light that is actually converted for use in forward projecting lighting. Vision X measures this by accounting for effective, rather than raw lumens in our distance calculations. The measurement of distance at which a light achieves one lux is the level of light needed to read a newspaper, also known as Usable Light.

TOTAL LIGHT OUTPUT = LUMENS

Light source placed into lumen sphere to measure the complete output of a source

RAW LUMENS | VS | EFFECTIVE LUMENS

Lumens are a common standard for measuring light output at the source. It is important to know that the lighting source manufacturer rating is only for the light source and does not account for losses due to optical inefficiencies, electrical inefficiencies, or heat.

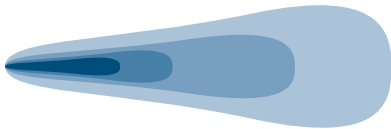

The sheer output of the light source is not enough to capture the whole story. When rating the effective output of a light source, the light lost as heat, in optical light spray, and electrical inefficiency must also be accounted for as each of these reduce the total usable lumens. Through the use of top binned LEDs, pulse width modulation, and electronic thermal management, Vision X Lights effectively produce the highest lumens per watt.

CHOOSING THE RIGHT BEAM

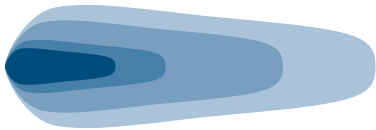

EXTREME / SPOT BEAM

Longest distance beam with the smallest spread that is ideal at high speeds. Vision X lights with a spot beam will be equipped with our Iris Reflector Technology.

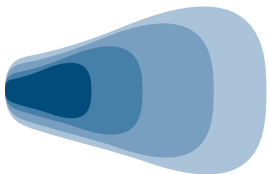

BROAD SPOT BEAM

Great distance beam with a moderate amount of spread. Broad spot beam pattern Vision X lights use multiple 10° optics or Iris Reflectors that are specifically arranged to still provide a large amount of distance with the added benefit of spread.

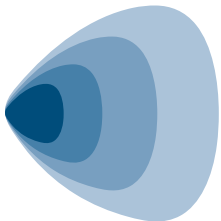

COMBO / DRIVING BEAM

Added peripheral illumination with the benefit of distance and spread. Similar to the broad spot beam, Vision X lights that produce a combo/mixed beam are equipped with multiple optics with varying degrees that angle light outward towards the side of your vehicle but still maintain distance and spread.

ELLIPTICAL / FOG BEAM

Flat forward spread that keeps low to the ground. This unique pattern is perfect for on-road use and is projected using a special optic type that is specifically engineered to keep the light low to the ground as to not blind oncoming vehicles.

FLOOD / WIDE FLOOD BEAM

Largest spread with the shortest distance. Vision X Lights with a flood beam will use multiple wide angle optics (40°, 60°, 90°) to produce a wide spread beam that is ideal for work area and scene lighting.

INCLUDED WITH EACH LIGHT

LIMITED LIFETIME WARRANTY POLICY

1. Proof of purchase is required to validate warranty and is valid from the original date of purchase. All products must be bought through a Vision X Authorized Dealer or one of their dealers/resellers.
2. Improper installation, accident, physical damage, neglect, and normal wear are not covered under warranty.
3. Cutting the deutsch connector automatically voids the warranty.
4. Lights operated in environments over 150° Fahrenheit are not covered under warranty.
5. Warrantied items will be repaired to working condition and returned without cosmetic alterations.
6. Warranties should be handled through the dealer/reseller the product was purchased from; customer is responsible for delivery to Vision X Returns in Washington.
7. If product is not under warranty, customers will be responsible for return shipping charges.
8. Additionally, non-warranted items can be repaired at the customer's expense of parts and labor, at the discretion of Vision X Lighting, who will provide an estimated repair cost before proceeding with the repair.

ADV
ADVENTURE SERIES LED DRIVING LIGHT

ADVENTURES JUST GOT BRIGHTER

Combining the superior distance of Iris Reflector technology with the spread of elliptical optics the ADV Light Cannon series shines a powerful combo driving beam that is optimal for all terrains. Coupled with a smooth back-lit halo and a robust 4-bolt steel trunnion bracket, the ADV Light Cannon Series was engineered to outshine and outlast the competition.

IRIS REFLECTOR AND OPTIC COMBO

The long distance Iris Reflector technology combined with the elliptical optics produce the perfect blend of light that fills in any roadway and beyond.

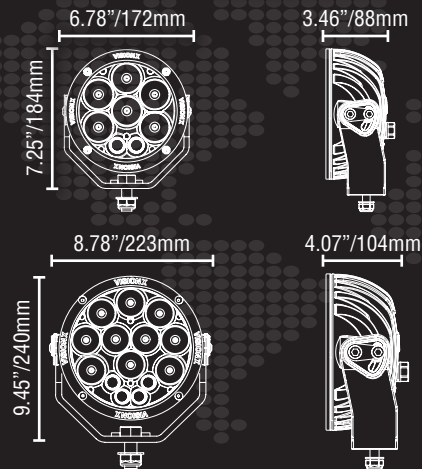

DAYTIME RUNNING HALO

The **SAE** compliant Halo provides the smoothest back lit glow day or night. Choose to run as a Daytime Running Light or place on a separate switch for style lighting on demand.

NEW | SAE STREET LEGAL | CG2 LIGHT CANNONS

OFF-ROAD DURABILITY WITH ON-ROAD USABILITY

Take to the streets with the new Vision X SAE street legal series lights. Our re-designed CG2 internals now feature our patented photon core along with our tuned mixed precision optics to be able to be used on-road but still provide the same durability to handle any off-road adventure. Choose between our smaller CG2 mini cannons for an ultra-wide fog beam or our 4.7" CG2 Light Cannon for high beam applications.

HIGH BEAM WITH MIXED PRECISION OPTICS

The SAE 4.7" Cannon uses a combination of flood and spot optics to produce a beam pattern that is prime for high beam street legal driving applications.

SAE J581 compliant
for street legal use

FOG BEAM WITH PHOTON LIGHT CORE OPTIC

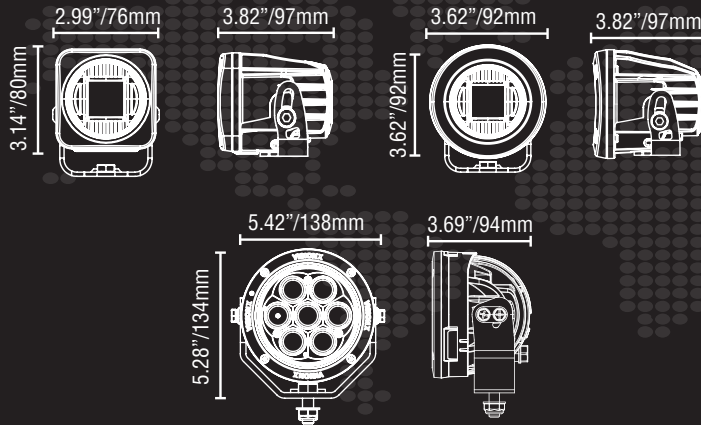

The SAE mini-cannon utilizes our new PLC optic technology to produce an ultra-wide elliptical beam that has a sharp cutoff to keep the light low to the ground and not blind oncoming traffic.

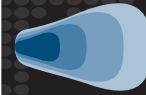

SAE J583 compliant
for street legal use

VL-SERIES

OFFROAD DRIVING LIGHTS

SPOT & FLOOD IN ONE COMPLETE KIT

Designed similarly to our popular round pod style lights, the VL Driving Light offers multi LED Reflectors to provide a spread of light at a distance. With the VL Driving series we are able to streamline the manufacturing process in our new facility to the point we can offer a free set of Flood Covers and bring the price down to a point even entry level offroaders will be happy with, while still maintaining the Vision X quality.

SLIM HOUSING DESIGN

The newly designed slimmer housing ensures the light won't extend past the width of the bracket making the VL-Series light perfect for bumpers and roof mounting

HEAVY DUTY ADJUSTABLE TRUNNION MOUNT

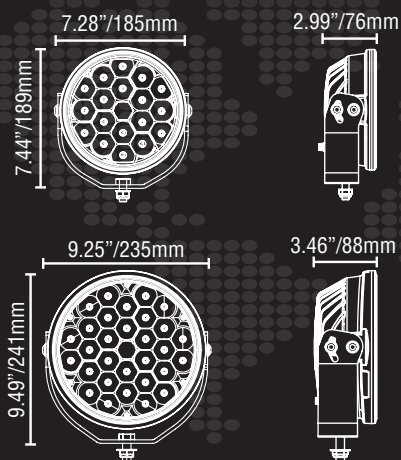

The powdercoated steel bracket allows for up to 60° of adjustment and will withstand any level of abuse and still remain secure to your vehicle.

COMPACT HOUSING MEETS DISTANCE OUTPUT

By combining single-source LEDs with our Iris Reflector technology, the Optimus Series is capable of reaching a staggering 883' of usable light at just 10W. The independent back-lit halo ring comes in either white or amber to provide extra style and utility. The Optimus's compact housing design is available in a 3.7" round or a 3" square making it the perfect size for fog light and ditch lighting applications.

COMPACT HOUSING DESIGN

The small yet mighty housing design comes in a standard 3.7" round and 3" square making it the perfect size for small / tight mounting spaces.

SMOOTH BACKLIT HALO OPTIONS

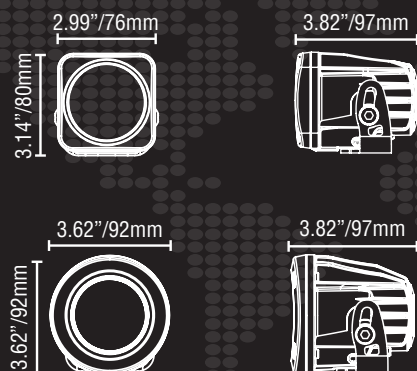

The back-lit halo function is available in Amber or White and is run independently from the light to allow it to be used a daytime running light or turn signal.

CHOOSE CONNECT SHINE

The Unite Modular LED Light Bar System brings lighting power and customization to the forefront by allowing you to build your light bar with endless configuration possibilities. Our quick-connect mounting rail provides a sturdy backbone for the modules to easily attach to. Each module features a 4-LED advanced optic design that comes in multiple different styles to match your lighting needs. The Unite Modular Light Bar system enables you to choose, configure, and build the light bar that you need for your vehicle.

MULTI-CIRCUIT FUNCTIONALITY

Each Unite Module can be powered separately or in groups with the help of our split-function power accessories.

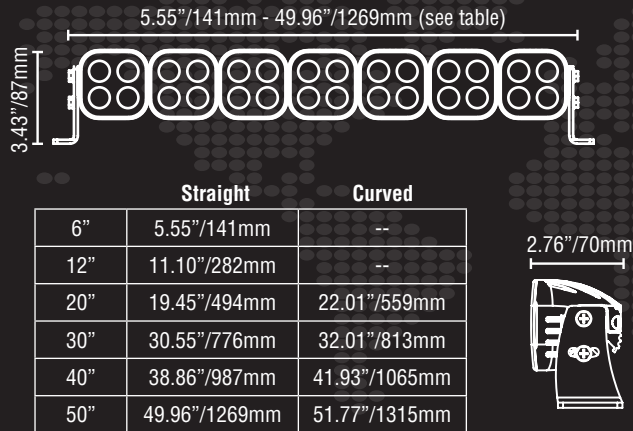

SLIDE AND LOCK MOUNTING RAIL

The extruded aluminum mounting rail allows you to quickly and easily remove and swap around Unite Modules.

WEATHERPROOF CONNECTORS

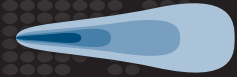

The "H" power connectors spread power from one pod to another in a watertight contact design.

SHOCKER X2

NEW | PRODUCT

DUAL ROW OUTPUT

The all-new Shocker X2 LED Light Bar packs two rows of our patented Iris Reflectors with 5W ultra-bright LEDs to produce a wide and long-distance beam pattern that is prime for turning any nighttime adventure into daylight. The dual row LEDs means that we are doubling the output when compared to most of our single row LED light bars making the Shocker X2 the newest and brightest addition to our LED light bar range. Lastly, the Shocker X2 also features our smooth back-lit halo function that our off-road lights are known for.

LENGTHS : 10" | 20" | 32" | 40" | 51"

HIGH OUTPUT CREE LED

The 5W XT-E HE LED from Cree coupled with our Iris Reflectors is what allows the Shocker X2 to project light up to 2,905 ft.

DUAL MOUNTING STANDARD

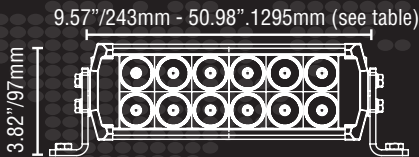

Each Shocker X2 Light Bar includes side wing mounts and our patented mounting feet to accommodate any mounting points.

SMOOTH BACKLIT HALO

The Shocker X2 comes equipped with our famous back-lit halo that can be used as a daytime running light or parking light.

SHOCKER
DUAL ACTION LED LIGHT BAR

DUAL ACTION PERFORMANCE

The Shocker Dual Action LED Light bar brings versatility and lighting power to the forefront by allowing you to adjust your vision to the ever-changing driving conditions with the flick of a switch. Experience the all new VRT (Vector Reflector Technology) at high speeds to shine long distance with a wide driving beam that also fans across the trail. When dust and fog tries to slow you down, engage the Amber PLC (Photon Light Core Technology) to penetrate the night by reducing shadows and white-out by using the proper Amber lighting color and wide-elliptical shaped beam.

LENGTHS : 12" | 20" | 30" | 40"

BOTTOM HALF | AMBER OR WHITE LED

PHOTON LIGHT CORE (PLC) WIDE ELLIPTICAL BEAM

The new Photon Light Core technology is the first of its kind. Our engineers designed the bottom half of the Shocker to produce a unique wide spread elliptical beam that keeps the light low to the ground.

TOP HALF | WHITE LED

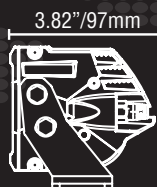

VECTOR REFLECTOR (VR) BROAD SPOT BEAM

With the flip of a switch, the Shocker bar transforms your light into a driving spot beam that utilizes our newly designed Vector Reflector Technology to boost the beam pattern out to 1,314ft.

XPL
LO-PRO LIGHT BAR SERIES
SAE STREET LEGAL

NEW | PRODUCT

OFF-ROAD DURABILITY WITH ON-ROAD USABILITY

Take to the streets with the new Vision X SAE street legal series lights. Our re-designed XPL internals now feature our patented photon core technology that produces an ultra-wide fog beam with a sharp cut-off to not blind oncoming traffic, making it prime and legal for on-road use. Available with our new selective yellow style lens, the XPL SAE light bar was built to tackle any weather conditions.

LENGTHS : 5" | 8" | 12"

PHOTON LIGHT CORE OPTIC

The XPL SAE Light Bar utilizes our new PLC optic technology to produce an ultra-wide elliptical beam that has a sharp cutoff to keep the light low to the ground and not blind oncoming traffic.

SELECTIVE YELLOW LENS OPTION

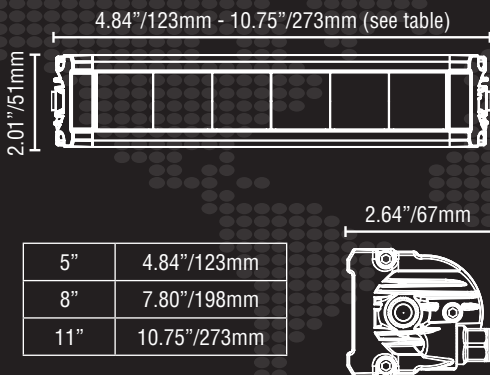

Choose between the standard clear lens and the new Selective Yellow option to maintain maximum visibility in dust, fog, rain or snowy conditions.

DUAL MOUNTING STANDARD

Each XPL Light Bar includes side wing mounts and our newly designed fully adjustable mounting feet.

XPL
LO-PRO LIGHT BAR SERIES

SLIM STYLE & PERFORMANCE

The XPL Halo Series LED Light Bar builds upon the XPR Series by combining the distance power of Iris Reflector Technology with an ultra slim housing design. Utilizing a powerful 5W Cree LED, the XPL series is able to produce up to 19,260 lumens and over 2,000 ft. of usable light.

LENGTHS : 6" | 10" | 13" | 20" | 32" | 40" | 51"

HIGH OUTPUT CREE LED

The 5W XT-E HE LED from Cree coupled with our Iris Reflectors is what allows the XPL to project light up to 2,067 ft.

DUAL MOUNTING STANDARD

Each XPL Light Bar includes side wing mounts and our newly designed fully adjustable mounting feet.

SMOOTH BACKLIT HALO

The XPL comes equipped with a back-lit halo that can be used as a daytime running light. (SAE Compliant for 20" and under)

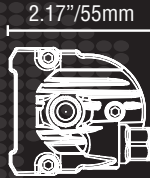

SAE J3098 compliant

RADIUSED STYLE & PERFORMANCE

The XPL Curved Halo Series LED Light Bar is our solution to growing demand for high performance curved light bars. We did it better and we are the first to do it featuring an ultra slim 2" housing with high intensity single row 5W LEDs. Utilizing our Iris Reflector Technology coupled with the unique curve of the bar, the XPL Curved Series produces a broad spot beam pattern that reaches over 1,800ft with up to 23,005 raw lumens.

LENGTHS : 20" | 30" | 40" | 50" | 54"

HIGH OUTPUT CREE LED

The 5W XT-E HE LED from Cree, coupled with our Iris Reflectors, is what allows the XPL Curved to project light up to 2,067 ft.

END CAP WING & STUD MOUNTING

COMBO BEAM FOR SPREAD & DISTANCE LIGHTING

The XPR LED Light bar series provides a powerful distance with **Mixed Beam tilted reflectors** to illuminate your peripherals. The 10-Watt LEDs through the large Iris Reflectors make this bar one of the furthest shining combo beam bars out there.

LENGTHS : 19" | 24" | 30" | 35" | 40" | 45" | 51"

END CAP STUD
MOUNTS AVAILABLE
(See p.87)

TILTED REFLECTORS

The XPR Features Tilted Reflectors on the ends that angle the beam outward to illuminate off to the sides of your vehicle.

DUAL MOUNTING STANDARD

Mounting options include side wing mounts and our patented mounting feet.

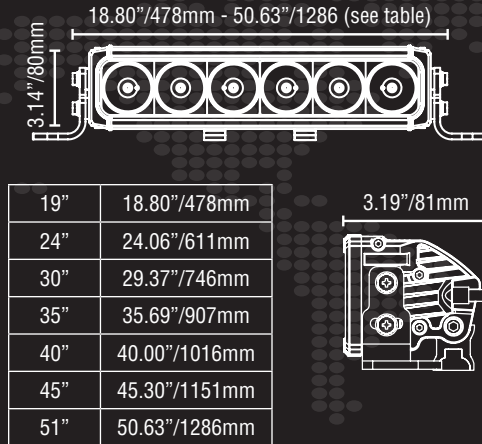

SMOOTH BACK-LIT HALO OPTION

The XPR features a bright back lighting that can be used as a daytime running light. (SAE Compliant for 24" and under)

SAE J3098 compliant
for street legal use

MODEL | 28" |

MODEL | 35" |

CHASER BAR FOR EXTREME ENTHUSIAST

The Vision X Chaser Bar provides high output color LEDs in a sleek, low profile housing with a bright flood beam pattern. This rear mounted light bar can be configured as your running and brake lights using standard Red, Amber, and White LED's.

The Chaser Bar comes in two sizes to accommodate stock UTV (28") and after-market UTV (35") roll cages.

HIGH OUTPUT COLOR LED

Combination of 5W (White) and 3W (Color) LEDs allows the XPL Chaser Bar to outshine the competition.

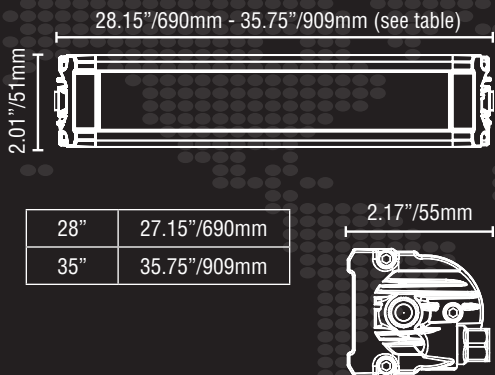

LOW PROFILE WATERPROOF HOUSING

The 2" slim IP-67/69K rated housing ensures a water tight seal even under the toughest conditions.

DUAL MOUNTING

The XPL Chaser comes standard with wing mounts with the option of just using the end cap bolt for side stud mounting.

LED HEADLIGHTS MEETS STYLE & PERFORMANCE

The DOT Approved VX Series LED Headlight leads the LED Headlight industry in both style and performance. With an integrated LED Halo Ring, the VX Headlight is sure to turn heads while also delivering a dramatically improved night driving experience over factory headlights. The VX Series is currently available in 7" & 5.75" Round as well as 4x6" Rectangle with a Polished Chrome finish or a Black Chrome finish.

ADR and E-MARK Approved models are available for those who live in Australia and Europe.

Multiple direct plug-and-play accessories are available that help give you the most out of your VX Series LED Headlight. (See p.74)

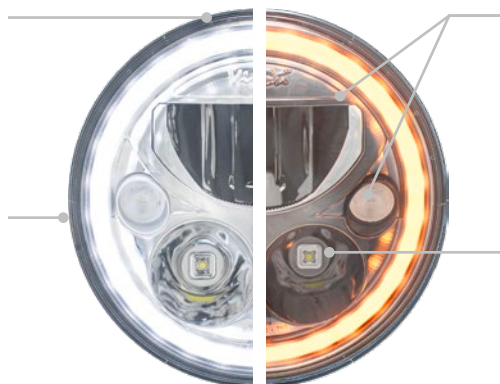

BRIGHT DAYTIME RUNNING HALO

Every VX Series Model Headlight features an ultra smooth LED Halo Ring that can be ran independently. Available in Amber or White LED.

WATERTIGHT HOUSING

The IP-68 watertight housing comes equipped with a ultra rugged Polycarbonate Lens and one-way Gortex ® Valve to block moisture build up.

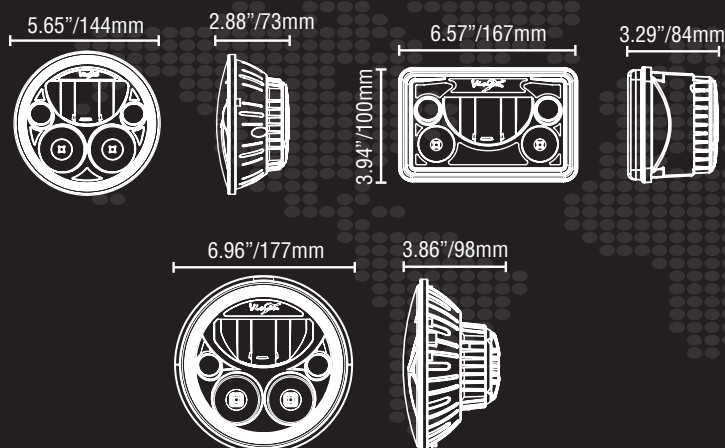

WIDE SPREAD LOW BEAM

One main 12W LED produces the wide spread low beam with the help of 5W LEDs on the sides to fill in the roadway directly in front of your vehicle.

HIGH OUTPUT HIGH BEAM

Two 10W LEDs located under the low beam utilize Iris Reflectors to produce a long range high beam.

LED PERFORMANCE PASSING LAMPS

Vision X Lighting's XMC 4.5" LED HALO Passing Lamp Kit grants extra visibility and enhances your safety on the road. These powerful 10W lights each pack five times more output than the stock passing lamps, and draw six times less amperage. Dramatically improve your performance while increasing visibility and safety. The MSR Style Reflectors give the XMC Passing Lights a powerful beam pattern than combines distance with full spread coverage.

OVERLAND
LED AREA LIGHT

NEW | PRODUCT

LIGHT UP YOUR ADVENTURE

The all-new Overland light is the perfect way to light up your campsite on your overland vehicle. You can easily attach the Overland light at multiple points on your vehicle to light up your campsite or a stopping point on the trail. With their low profile design, the Overland light mounts perfectly beneath most rack systems using 60°/40° flood optics perfect for area lighting. With only 15 watts of draw pushing a massive 1,140 lumens you can easily light up a campsite for hours without running your vehicle and enjoy the serenity of nature. Watertight and dust proof, the vented housing prevents moisture buildup making these the perfect area lighting for your overland vehicle.

MIXED FLOOD OPTICS

Equipped with a mix of 60° and 40° Flood optics, the Overland Area Light is ideal for any scene lighting application.

HEAVY DUTY ADJUSTABLE BRACKET

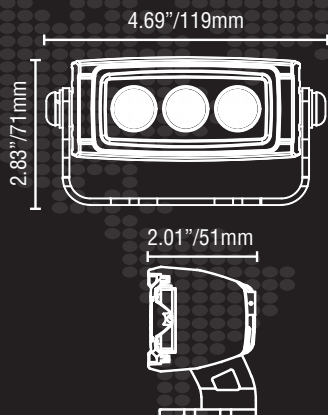

The powder coated steel bracket allows for up and down mounting height adjustments as well as up and down light angle adjustments.

COMPACT HOUSING DESIGN

The slim rectangle designs makes the Overland Area Light perfect size for roof racks or tight spaces around your vehicle .

VL-SERIES

LIGHT DUTY COMMERCIAL

VERSATILITY MEETS LIGHT OUTPUT

The VL-Series LED Light Duty offers outstanding light output in a functional design which can be easily adjusted with the single bolt bracket. High quality construction and components enables the VL-Series LED Light Duty lights to withstand vibration up to 15.6 Grms. Built-in reverse polarity protection helps prevent accidental damage caused by incorrect installation. VL-Series LED Light Duty work lighting is a high value, versatile range designed for many light duty commercial applications.

ULTRA BRIGHT CREE LEDS

Utilizing 5W Cree LEDs, the VL-Series Lights pump out 106 Lumens per watt.

FLOOD OPTICS

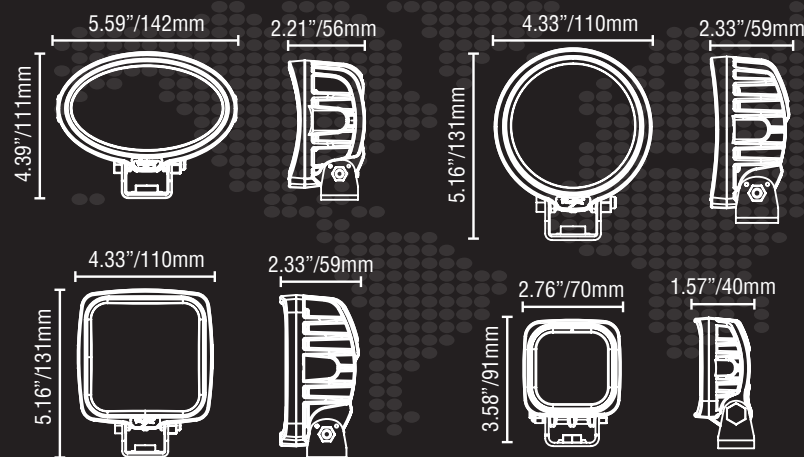

Each LED has a 40° flood optic that allows for each light to produce a wide spread beam.

UNIVERSAL MOUNTING

The single bolt mounting system allows for simple and easy placement.

VX GRILLES | FULL REPLACEMENTS

Beam/Color Changing
Polycarbonate Covers (See p.82)

CG2 LIGHT CANNON | OPTION

FEATURING CG2 4.7" LIGHT CANNONS

The CG2 Light Cannons is Vision X's latest and greatest of the Light Cannon series. This configuration combines the distance of the big chip single source CG2 Cannon with the massive light output of the multi-LED version. The pairing of these two lights creates an unheard of amount of brightness and distance ideal for any situation.

COVER OPTION
Blackout Cover (See p.82)

XPR LIGHT BAR | OPTION

FEATURING XPR-9M LIGHT BAR

Utilizing top-binned 10-Watt LEDs and large proprietary 1.5" diameter IRIS Reflectors, the XPR-9M Light Bar is capable of reaching a staggering 1,365 feet of usable light. This unmatched long-distance projection is also accompanied by precisely tilted IRIS Reflectors that create a unique combination beam pattern to provide even more visibility at the road's edge.

MORE GRILLES AVAILABLE!

Your vehicle not listed? You still may be in luck. We offer a wide variety of Grille LED lighting kits and not all of them could be shown in this catalog.

HALOGEN

SEALED BEAM

SEALED BEAM
DIRECT REPLACEMENT

The Sealed Beam Housing are the perfect upgrade to your OEM headlight. The die-cast housing are constructed with a Borosilicate glass lens which provide a tougher alternative to the stock plastic lens. Coupled with the advanced multi-surface reflector, the Sealed Beam Headlight series are made to last.

HALOGEN BULBS FOR BRIGHTER AND WHITER LIGHT

Increase brightness by up to 50% with the Vision X headlight bulbs. Vision X headlight bulbs provide a more natural light for increased visibility and safety. With three lines to choose from, we offer the perfect mix of cost and performance for any driver.

Unlike other Halogen Bulbs on the market, Vision X D-Series bulbs are DOT Approved and offer a lifetime warranty. Enhance your night time driving experience while cooperating with all laws and regulations.

* For H&L Series Bulbs refer to website for Part #s.

LIGHTING ACCESSORIES

82 Pod Light Covers

83 Light Bar Covers

84 Selective Yellow Lens

85 Wiring Accessories

86 Mounting Accessories

LIGHT COVERS

25 LIGHTS IN 1 WITH POLYCARBONATE COVERS

Each Light Cannon is 25 Lights In One with the help of the unbreakable polycarbonate snap-on covers that can alter the beam pattern and change the color of the Cannon. Tackle any weather condition with the proper color cover, or quickly change your spot cover to a flood cover for a wider beam when necessary.

COLOR OPTIONS

BLACKOUT | PROTECTIVE

Covers the fixture with a solid black protective cover with a high contrast "X" logo. Required in select states for on-road use.

CLEAR | PROTECTIVE

Protects light from dust, debris and particulates without changing light color or performance.

AMBER | FOG

Battles fog conditions by reducing the amount of blue light. Mimics classic Halogen color temperature. Great for driving in fog at high speeds.

BLUE | SNOW

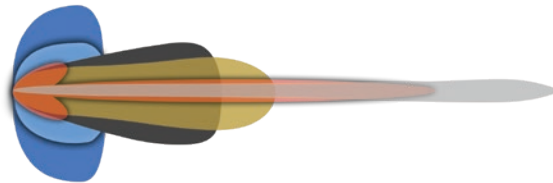

Increases lighting distance when used in snow conditions by reflecting the blue light off the snow. Recommended for vehicles in heavy winter conditions.

RED | DUST

Reduces light temperature and glare back in order to enhance penetration in dust and air particulate. Ideal for vehicles in extreme dust conditions.

BEAM OPTIONS

SPOT

Spot covers maintain original lighting beam pattern while protecting the lens from harmful debris.

COMBO

Combo covers combine the distance of a spot cover with the added peripheral illumination of a elliptical cover.

EURO

Illuminate some peripherals while maintaining effective distance.

ELLIPTICAL

Reduces peripheral illumination while losing minor distance.

WIDE FLOOD

Maximum wide field of view illumination in exchange for distance.

TRAIL FLOOD

Maximum vertical field of view illumination in exchange for distance.

BLACKOUT | PROTECTIVE

LENSES

POD LIGHTS

SELECTIVE YELLOW LENS KITS

The selective yellow lens transforms your Vision X light to be able to cut through any harsh weather conditions and allows you to see further than you would with traditional white lighting. Whether its dust kick-up from the trails or a foggy night, the selective yellow lens will help you maintain maximum visibility without sacrificing light output.

PART#	DESCRIPTION
9946894	Single Selective Yellow Lens for 3.0-3.7" CG2 or Optimus Pod Lights
9946900	(2) Selective Yellow Lenses for 3.0-3.7" CG2 or Optimus Pod Lights
9946818	Single Selective Yellow Lens for 4.7" CG2 Pod Lights
9946825	(2) Selective Yellow Lenses for 4.7" CG2 Pod Lights
9946832	Single Selective Yellow Lens for 6.7" CG2 or ADV Pod Lights
9946849	(2) Selective Yellow Lenses for 6.7" CG2 or ADV Pod Lights
9946856	Single Selective Yellow Lens for 8.7" CG2 or ADV Pod Lights
9946863	(2) Selective Yellow Lenses for 8.7" CG2 or ADV Pod Lights

WIRING

ACCESSORIES

PRIME DIMMER | MODULE

PART#	DESCRIPTION	DIMMER RANGE
4009257	Dimmer Controller With Dial Knob	50% - 100%
4009264	Dimmer Controller With Button	50% Or 100%

VX HEADLIGHT | ADAPTERS

PART#	DESCRIPTION	FUNCTION
9895475	Hi4 Headlight Adapter	Engages all three beam modes at once for maximum visibility
9932590	Hi4 Headlight Adapter for Jeep JK	Engages all three beam modes at once for maximum visibility w/H13 Jeep JK Plugs (Pair)
9898476	Anti-Flicker Headlight Canbus Adapter	Prevents flickering w/H13 Plugs. Allows for use with Jeep JK for non Jeep Specific Headlights to Prevent flickering. (w/H13 Plugs)

UNIVERSAL HARNESSSES | WIRING

PART#	DESCRIPTION
4006201	2 Light Wiring Harness
4006195	Single Light Wiring Harness (Low Amp)
9888354	Single Light Wiring Harness (High Amp)
4006263	"Y" 2 Light Splitter Adapter
4006218	Single Light Cigarette Adapter

MOUNTING

SOLUTIONS

LICENSE PLATE MOUNT | KIT

The License Plate Mount makes it easy to add any 12" Vision X LED Light Bar, meaning that you can add up to 4,700 lumens to your vehicle with no drill holes or mess.

PART#	DESCRIPTION
4000308	License Plate Bracket Only

WINCH MOUNT | KITS

The Vision X 6" and 10" winch mount allows you to add any 12" light bar to the front of your vehicle and boost your lumen output.

PART#	DESCRIPTION
9892320	10" Bracket Only
9892313	6" Bracket Only

TOW HITCH MOUNT | KITS

The Vision X 11.5" backup light receiver adapter uses machined 6061 aluminum and will fit over any Class 3 or 4 (2") tow hitch.

PART#	DESCRIPTION
4000322	Tow Hitch Mount Bracket Only
4008595	Tow Hitch Mount With 2x Solstice Solo

TUBE CLAMP | MOUNTS

PART#	DESCRIPTION
9897325	0.75" Tube Clamp Pair
9897301	1.0" Tube Clamp Pair
9897288	1.25" Tube Clamp Pair
9897264	1.50" Tube Clamp Pair
9897240	1.75" Tube Clamp Pair

PART#	DESCRIPTION
9893372	2.0" Tube Clamp Pair
9893389	2.25" Tube Clamp Pair
9893396	2.50" Tube Clamp Pair
9893402	3.00" Tube Clamp Pair

FLUSH MOUNT | KITS

PART#	DESCRIPTION
9933115	Dura Mini Flood Beam Flush Kit (Pair)
9933108	Dura M4M Combo Beam Flush Kit (Pair)
9892993	Dura 4 Flood Beam Flush Mount
9893006	Dura 6 Flood Beam Flush Mount

LIGHT BAR END CAP | MOUNTS

Using End Cap Mounts allow you to mount your light bar in tight spots where standard mounting won't cut it. Ideal for Roof, Bumper and Grill locations.

PART#	DESCRIPTION
9892917	Light Bar End Cap Mounts For XPR & XPR-S
