# LIGHTING SOLUTIONS

Vision X lighting fixtures are not merely lighting systems, they are engineered lighting solutions. They provide increased efficiency, increased safety, decreased environmental impact, and decreased costs. Vision X LED lights offer a large increase in energy efficiency over older technologies while also increasing the safety and productivity of the working environment by outputting 80% more light than the fixtures used previously.

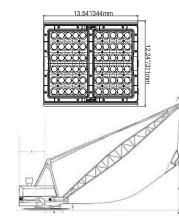

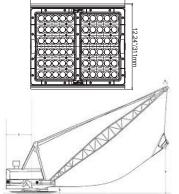

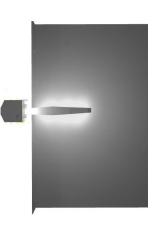

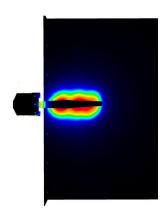

# **2D BLUEPRINT**

Vision X Lighting begins each project with a customer provided list of machines to be retrofitted, then gathers the technical information for those machines.

# **3D MODEL**

A 3D model is built to the customer's specifications, then carried over into the rendering.

# **SIMULATION RENDER**

A simulation rendering ensures the final product will meet the customer's lighting requirements.

# **SOLUTION**

Vision X Lighting creates a complete breakdown of the customer's specific needs to meet their safety requirements.

### **Application**

Designed to directly bolt in, these OEM replacements will out perform the factory P&H lighting by over 80% on the effective work area. Simple quick connect wiring allows for one time wiring and no further electrical wiring to change the fixture. 3D analysis allows for site specific aiming with our patented ProTrac aiming system. Industry leading LED light output, size, weight and reliability for reduced unscheduled maintenance.
