

NIGHTTIME HARVEST SOLUTIONS

For Agricultural Applications

LED | LIGHTING CATALOG

LED EFFICIENCY

The latest LEDs provide a mass volume of light where you need it most. Each light module emits 117 lumens per watt and is designed with a clear bezel for a wider dispersion of light. The color temperature of LEDs is closer to that of sunlight which reduces eye strain and enables excellent peripheral vision.

MOUNTING FLEXIBILITY

The adjustable pole mount design extends five to nine feet allowing precise positioning and heightened productivity during the night hours.

EASY STORAGE

Dual ball joints allow the fixture to be folded down for compact storage.

IP68/IP69K RATING

The IP68/69k rating ensures that the work lights are dust tight with no ingress of dust and protected against high pressure, high temperature wash downs. The IP68/69k rating is the highest protection available.
